## DeckWright Anti-Slip Marina Decking

**Providing sustainable, reassuring performance**

DeckWright are a leading manufacturer of anti-slip decking across the UK & Ireland. With almost two decades in the timber industry, we have the expertise and knowledge to provide high-quality and safe solutions to our customers. We treat and distribute a range of decking board profiles and species to a large, established network.

Our anti-slip treatment has proven extremely successful in areas like marinas and boardwalks due to the nature of their close proximity to water. Throughout different seasons and weather exposure, DeckWright boards are a durable, safe and long-lasting solution.

DeckWright anti-slip treatment is a flexible mix of modified two-part polyurethane resin impregnated with bauxite aggregate. Commodity code: 3921131090. The DeckWright anti-slip process can be applied to most species and specifications of timber.

Our recommended board size for marina specifications is 45mm x 145mm, a thick, robust and durable board built to last. Available in Use Class 3 or Use Class 4 treatment, these boards have an extremely high Pendulum Test Value (PTV) of 71.

DeckWright® 45x145mm Profile

DeckWright Anti Slip product has been independently tested and approved by the Health & Safety Laboratory in Buxton, in accordance with British Standard BS 7976: 2002.

DeckWright Anti Slip is a DeckMark and DeckMark + performance rated product through the TDCA (Timber Decking and Cladding Association).

DeckWright is available with PEFC and FSC® certification. Ask for our FSC® products.

**FSC® chain of custody number: NC COC 026801 EA**  
**PEFC certification number: CATG PEFC COC 633**

## DeckWright Technical

### Providing sustainable, reassuring performance

#### Pendulum Test Value

PTV	Slip Risk
00 - 24	High
25 - 35	Moderate
36 to 65	Low
65+	Extremely Low

#### Durability

We use bauxite aggregate for our anti-slip inserts paired with a specialist liquid resin, precision injected into the groove of the timber deck board. The bauxite aggregate achieves an impressive value of 1.1 Mohs hardness scale.

Durability of the timber boards are species specific, please contact your sales rep for more information.

#### Packaging & Storage

We provide all of our boards in pallets which are weather wrapped and strapped for security. All packaging from DeckWright is designed to eliminate and risk of sagging, we strongly recommend packaging is withheld until use unless stored in a similar fashion.

#### Post Installation Treatments

DeckWright boards or boards with our anti-slip treatment can be stained with paints, stains or oils if required. These treatments will not have an adverse effect on the anti-slip.

We do recommend that liquids other than natural liquids that come into contact with the boards are cleaned from the surface of the boards immediately in order to maintain the full effect of the anti-slip treatment and remove unwanted staining of the timber.

#### After Care & Maintenance

DeckWright boards are a low-maintenance product. We would recommend that boards are maintained with a ad-hoc schedule of sweeping and water pressure washing with 120 bar of pressure at 30cm distance from the boards.

#### Profile & Length Sizes

##### Profile

DeckWright supply marina and boardwalk spec boards at a standard profile size, nominal **45mmx145mm**. We're capable of supplying custom profile lengths and can anti-slip treat any hardwoods or softwood timbers.

##### Lengths

DeckWright standard boards come in either 3.6m or 4.8m. We offer other lengths where required, please speak to your sales rep for more information.

#### 15 Year Warranty

DeckWright anti-slip comes with a 15 year warranty.

#### Treatment Colour

DeckWright anti-slip boards come with either use class 3 treatment or use class 4 treatment depending on end use specification. This gives a slight green colour to the timber which naturally fades into a silver.

#### Installation

We recommend that installers of our DeckWright anti-slip products follow Timber Decking & Cladding Association guidelines. Please visit: [www.tdca.org.uk](http://www.tdca.org.uk) for more information.

For cutting the boards, please be aware of the strength of the aggregate & resin solution and use an appropriate blade for the job.

Treating areas that have been cut, drilled or notches in the timber boards is strongly recommended to the keep the integrity of the timber.

#### Disposal

DeckWright boards are non-hazardous materials and can be disposed. Shavings and sawdust bi-products should not be re-used in anyway including but not limited to animal beddings and fires.

*For further information, please speak to our team.*

## Experienced In Large Projects

### Delivery that you can trust

We're a long-standing, trusted manufacturer and supplier of anti-slip decking. Our years of experience have provided us with the ability to cater for projects of all sizes.

We have our own fleet of HGVs and LGVs allowing us to offer a extremely competitive delivery prices with all orders. We have two dedicated anti-slip decking production facilities in the UK. With one facility in East Yorkshire and the other in Rochester, Kent, we're able to provide quick and timely supply to projects throughout the UK.

If you have a preferred supplier of decking boards, we can provide the anti-slip treatment if you send us your boards. The boards need to be untreated before being sent to us and we can preservative treat them to UC3 or UC4 depending on your requirements through our in-house treatment facility after they have been anti-slip treated.

## Looking For Samples?

**Sample boxes are available on request**

We're proud of the products we offer, we have a wide range of samples we can send you to see for yourself.

We're proud of our products and we're confident that when customers see our boards first-hand, they understand their effectiveness. If you're still not sure, please get in touch for a free, no obligation sample box with your specified species or board profile included.

## Add Colour!

You can also bring a layer of added safety or personalisation to your order with custom coloured bauxite within your grooves. Whether you're looking to brand your anti-slip boards with company colours or adding that extra safety element with brighter colours, DeckWright® can help.
